

biochimeneas  Pur Line

the real flame for your home

welcome to the real flame  Pur Line

We hope today is only the beginning of an event that will change your home spirit and atmosphere.

It's our pleasure to present you a small part of the universe that surrounds the PurLine flame among these pages, but the best is still yet to come ...

light
warmth *passion*
comfort *enjoyment*
beauty
magic *innovation*
charm *pleasure* *design*

the first flame

- Carefully read the manual. You're going to start a real fire and you must maintain maximum security.
- Choose the best place to put your PurLine ethanol fireplace.
- Carefully fill the tank with bioethanol fuel (no more than 3/4 of its capacity).
- Use a long lighter or long match to light the fireplace.
- Fuel will burn low at first. The fire will gain intensity gradually and after a few moments you'll enjoy the beauty of a real flame in your home.

Pur Line

*power
to create fire*

- PurLine biofireplaces are powered only with ethanol for heating. Denatured ethanol is biodegradable and a renewable energy source. It produces a beautiful yellow flame without smoke or odor, and provides a direct and immediate heat.

• To create a real flame, your biofireplace needs a proper fuel. PurLine Ethanol for fireplaces gives you the security of having a high quality combustible, smokeless, odorless and non toxic when burning, since it only produces water vapour and small amounts of CO2 (similar to have two lit candles).

your first order

- You can purchase Purline ethanol for your biofireplace by:

www.biochimeneas.com

tel. +34 91 392 05 09

Shops - See the list of the main distributors of Purline ethanol for fireplaces on the "Points of sale" (Puntos de venta) section on our web.

promo

Register on our website and receive a free decorative leaves set with your first order of Purline ethanol for fireplaces.

decorate your biofireplace

- Logs

- Stones (gray or white)

- Leaves

renovate your traditional fireplace

- With PurLine burners you can turn a traditional fireplace in a biofireplace. You just have to place the burner in the hearth, so you can forget about smoke and ashes.

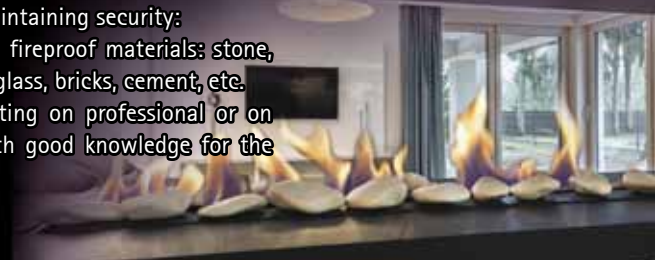

or create your own design

- Another great option due to the Purline burners is to create your own fireplace, so much easier and cheaper than a traditional fireplace. No chimney or flue is required, so they can be placed just about anywhere.

Always maintaining security:

- by using fireproof materials: stone, tempered glass, bricks, cement, etc.
- by counting on professional or on person with good knowledge for the work.

safety conditions

the biofireplace

- Never leave a fire unattended.
- Keep a fire extinguisher near the fireplace.
- Do not use the fireplace near flammable materials.
- Keep children and pets away from the fireplace.
- The fireplace may become very hot during use, do not touch any surface without allowing proper time to cool.
- Use the fireplace in a place with proper air exchange.
- The burner and the ethanol should not be exposed to direct sunlight or direct heat from heaters and other sources of heat.
- Do not insert foreign objects in the fireplace.
- If you have accessories for your fireplace, put them without block the burner.
- Never try to extinguish the flame blowing or with water.
- It is recommended to let the fuel burn out completely if possible. In case you need to put out the fire before, use the fire killer that comes with the fireplace.

the fuel

- Use only denatured ethanol for heating. Other substances could impair your new fireplace or worse yet, be harmful to your health and the environment.
- Do not smoke while handling bioethanol.
- Store the fuel tightly closed and keep out of reach of children and animals.
- Pay close attention when filling the burner with fuel, for not splash out or exceed 3/4 parts of the tank.
- Never add fuel when the burner is warm or when there is any flame present.
- Do not store additional fuel anywhere near the fireplace or another source of heating.
- Respect the environment! Never throw out the ethanol in wastewater system or in nature.

!

Please, read carefully the user manual included with your new fireplace, to understand its correct operation.

*We hope you enjoy
the real flame Purline.*
